# Critter'N ELA and Math Sorts

Thanks so much for downloading my Critter'N ELA and Math Sorts. This packet is designed to offer a fun and engaging way to practice literacy and math skills. You will be able to use these sorting centers as a supplement to your whole-group lesson and/or as an independent center option. To prep the centers, simply print the two sorting mats, the two pages of cards and then cut these cards individually. You will then print out the matching recording sheet. The students will need to have a pencil, crayons, scissors and glue. Below you can see the sorts in action. If you choose to utilize these centers for more than one use, then you'll want to laminate them for durability. On the following pages you can learn some additional tips and tricks for the sorts.

If you have any additional questions as always, feel free to email me at [littlemindsatworkllc@gmail.com](mailto:littlemindsatworkllc@gmail.com), follow me on [Facebook](#), or visit my blog, [Little Minds at Work](#).

You can follow the word lists on the following page if you should be unsure about a certain word/picture. You can take it a step further by writing the picture name on the back of each card. Students will be able to turn over the card and self-check.

Each of the sorts comes with its own sorting cut and glue practice sheet. This is a great way to show student mastery of the independent center. Students can complete the practice sheet at the end of the center.

Each of the mats are labeled with the sort number. The cards are also labeled with sort number. You can store the mats and cards in a baggie for easy access.
